Trading any financial market involves risk. This report and all and any of its contents are neither a solicitation nor an offer to Buy/Sell any financial market.

The contents of this report are for general information and educational purposes only (contents shall also mean the website www.rapidresultsmethod.com or any website the content is hosted on, and any email correspondence or newsletters or postings or affiliate site as related to such website). Every effort has been made to accurately represent this product and its potential. There is no guarantee that you will earn any money using the techniques, ideas and software in these materials. Examples in these materials are not to be interpreted as a promise or guarantee of earnings. Earning potential is entirely dependent on the person using our product, ideas and techniques. We do not purport this to be a "get rich scheme."

Although every attempt has been made to assure accuracy, we do not give any express or implied warranty as to its accuracy. We do not accept any liability for error or omission. Examples are provided for illustrative purposes only and should not be construed as investment advice or strategy.

No representation is being made that any account or trader will or is likely to achieve profits or losses similar to those discussed in this report or anywhere on www.rapidresultsmethod.com. Past performance is not indicative of future results.

By purchasing and/or using any content or product including material herein contained, subscribing to our mailing list or using the website or contents of the website or materials provided herewith, you will be deemed to have accepted these terms and conditions in full as appear also on our site, as do our full earnings disclaimer and privacy policy and CFTC disclaimer and rule 4.41 to be read herewith. So too, all the materials contained within this course, including this manual, whether they appear on our domain(s) or are in physical form, are protected by copyright. "Warning: The unauthorized reproduction or distribution of this copyrighted work is illegal. Criminal copyright infringement, including infringement without monetary gain, is investigated by the authorities and is punishable with imprisonment and a fine." We reserve all our rights in this regard.

Old Tree Publishing CC, in association with www.rapidresultsmethod.com, the website, content, and its representatives including Russ Horn do not and cannot give investment advice or invite customers or readers to engage in investments through this report or any associated software or any subscription to any part of it.

The information provided in this content is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to law or regulation or which would subject us to any registration requirement within such jurisdiction or country.

Hypothetical performance results have many inherent limitations, some of which are mentioned below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and actual results subsequently achieved by any particular trading program and method or software. Old Tree publishing by users download and/or use of this report is indemnified fully by any such user in any and all and each respect possible.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk and no hypothetical trading record can completely account for the impact of financial risk in actual trading.

For example, the ability to withstand losses or to adhere to a particular trading program or system in spite of the trading losses are material points that can also adversely affect trading results. There are numerous other factors related to the market in general or to the implementation of any specific trading program, which cannot be fully accounted for in the preparation of hypothetical performance results. All of which can adversely affect actual trading results.

We reserve the right to change these terms and conditions without notice. You can check for updates to this disclaimer at any time by visiting www.rapidresultsmethod.com.

Your use and reliance on the materials is based on your acceptance of such Terms and Conditions and policies as appear on the site.

The Sea Trading System

Today, I want to share with you a unique trading system which I call, the Sea Trading System. That's because the signals occur when every indicator involved falls below its middle level, which looks like a sea level.

This system can be traded on every timeframe available and can bring you good gains if the rules are followed correctly.

System Components & Indicators

Timeframe:

All timeframes

Currency Pairs:

Major pairs such as the EUR/USD and the GBP/USD.

Indicators:

1. Bollinger Bands (20,3)
2. 3 period Exponential Moving Average (EMA)
3. Moving Average Convergence Divergence (MACD) - 6,17,1
4. 14 period Relative Strength Index (RSI)

Chart Setup

1. Bollinger Bands (20,3)

1. Click on the **Navigator** button to open the Navigator window.
2. Click on **Indicators** to expand the list of indicators.
3. Find **Bollinger Bands** on the list and double click on it.
4. Set the **Period** to 20.
5. Leave the **Shift** at 0.
6. Set the **Deviation** to 3.
7. Leave the **Apply to** section at the default value, Close.
8. Click **Style** and choose Red for the color of your indicator.
9. Leave the line type as it is by default.
10. This is for setting the indicator's line width.
11. Click on the **OK** button to apply the Bollinger Band indicator on your chart.

1. 3 Period Exponential Moving Average (EMA)

1. Click on the **Navigator** button to open the Navigator window.
2. Click on **Indicators** to expand the list of indicators.
3. Find **Moving Averages** on the list and double click on it.
4. Set the **Period** at 3.
5. Leave **Shift** at 0.
6. Click on the **MA method** drop down menu and select Exponential.
7. Leave the **Apply to** section at the default value, Close.
8. Click **Style** and choose Lime as the color for your indicator.
9. Leave the line type as it is by default.
10. This is for setting the indicator line width.
11. Click on the **OK** button to apply the 14 SMA on your chart.

2. MACD (6,17,1)

1. Click on the **Navigator** button to open the Navigator widow.
2. Click on **Indicators** to expand the list of indicators.
3. Find **MACD** on the list and double click on it.
4. Set the **Fast EMA** at 6.
5. Set the **Slow EMA** at 17.
6. Set the **MACD SMA** at 1.
7. Leave the **Apply to** at Close (default).
8. Click on the **Colors** tab.
9. On the **Main** dropdown menu, choose Blue as the color of the histogram.
10. This is for setting the MACD histogram line type.
11. This is for setting the MACD histogram bar's width.
12. Click on the **Signal** dropdown menu and chose Red as the color of your indicator Signal line.
13. This is for setting the Signal line type.
14. This is for setting the Signal line width.
15. Click on the **Levels** tab.
16. Click on the **Add** button and a 0 level will appear on the left side of the box.
17. Here you can customize the level color, line type and width. Leave all of them as they are by default.
18. Click on the **OK** button to apply the MACD indicator on your chart.

3. 14 period Relative Strength Index (RSI)

1. Click on the **Navigator** button to open the Navigator window. (1)
2. Click on **Indicators** to expand the list of indicators. (2)
3. Find **Relative Strength Index (RSI)** on the list and double click on it. (3)
4. Leave the **Period** at 14 as it is by default. (4)
5. Leave the **Apply to** section at the default value, Close. (5)
6. Click **Style** and select DodgerBlue as the color of the indicator (5).
7. Leave the line type as it is by default. (7)
8. This is for setting the line width. (8)
9. Click on the **Levels** tab. (9)
10. Click on the **Add** button and enter 50 for the level. (10)
11. Here you can customize the level color, line type and width (11). Leave all of them as they are by default.
12. Click on the **OK** button to apply the RSI on your chart. (12)

Long Entry Rules

1. The 3 period EMA must cross above the Middle Bollinger Band.
2. The MACD must cross above the 0 level.
3. The 14 period RSI must cross above the 50 level.
4. When all the conditions above are met, place a buy order.
5. Set the Stop Loss a few pips below the nearest swing low or the Lower Bollinger Band, whichever is closer.
6. Set the Take Profit at the Upper Bollinger Band or use a fixed profit target, depending on the timeframe you are trading. Here are some examples of fixed Take Profit targets in pips for each timeframe:

M1 (1 minute):	3-5 pips
M5 (5 minute):	5-10 pips
M15 (15 minutes):	15-20 pips
M30 (30 minutes):	25-30 pips
H1 (1 hour):	40-60 pips
H4 (4 hours):	80-100 pips
D1 (Daily):	150-200 pips

Let's have a look at a long trade example on the next page.

Long Trade Example

Above, we have long trade taken on GBP/JPY H4 chart along the vertical line (A).

Prior to the entry, when the RSI crossed above the 50 level, we got the first sign to start looking for long trade. The MACD also crossed above the 0 level. A few candles later the 3 EMA crossed above the Middle Bollinger Band.

After the close of the current set up candle, a long position was opened at 126.283 (B).

Then, a Stop Loss of 80 pips under the entry was set, just below the last swing low point at 125.483 (C).

Next, a Take Profit Target of 100 pips was set at 127.283 (D), which was hit right at the very next candle.

Now let's take a look at Short trade conditions.

Short Entry Rules

1. The 3 period EMA must cross under the Middle Bollinger Band.
2. The MACD must fall below the 0 level.
3. The 14 period RSI must move below the 50 level.
4. When all the conditions above are met, place a sell order.
5. Set the Stop Loss a few pips above the nearest swing high or the Upper Bollinger Band, whichever is closer.
6. Set the Take Profit at the Lower Bollinger Band or a fixed target, depending on the timeframe you are trading.

Let's take a look at a short trade example on the next image.

Short Trade Example

Here, we have a short trade on the EUR/USD H1 chart, along the vertical line (A).

First, the RSI crossed below the 50 level and almost simultaneously, the 3 EMA crossed below the Middle Bollinger Band. The last signal was given by the MACD when it fell under the 0 level.

Immediately after the close of the setup candle, a short trade was placed at 1.30512 (B).

Next, a Stop Loss of 15 pips above the entry was set, at 1.30662, which is just above the last swing high (C).

And then, a Take Profit of 40 pips was set at 1.30112 (D). As you can see, the Take Profit was hit 4 hours later.

That's all there is to the Sea Trading System. I know a lot of traders who use this kind of method, because it can be traded on each timeframe, it is simple to follow, and is also profitable. Try it and collect the profits that you deserve.

Thanks for the time you spent with me. I wish you good trading profits.

Best Regards,

Russ Horn
